PHYSICA A
VOLUME 142A, No. 1–3 **APRIL 1987**

CONTENTS

ELKENS, Y., Nonunitary transformations and hydrodynamic limit in the one-dimensional hard-point gas 1

BELL, J.M., Phase diagrams of BCC alloys 22

WADA, K., ISHIKAWA, T. and TSUCHINAGA, H., Derivation of the master equation from the path probability method 38

NIEUWWOUDT, J.C., KESTIN, J. and SENGERS, J.V., On the theory of oscillating-body viscometers 53

SHIMIZU, T., Perturbation theory analysis of chaos. I. Transition from quasiperiodicity to chaos 75

RYTER, D., On the eigenfunctions of the Fokker–Planck operator and of its adjoint 103

RYTER, D. and MEYR, H., Multistable systems with moderate noise: coarse-graining to a Markovian jump process and evaluation of the transition rates 122

ORAEVSKY, V.N. and SEMIKOZ, V.B., Induced electric charge of the neutrino in a dispersive medium 135

SEMIKOZ, V.B., Kinetics of a lepton plasma in the standard model of electroweak interactions 157

FREIDKIN, E., RISEBOROUGH, P.S. and HÄNGGI, P., Decay of a metastable state: a variational approximation 178

WIERSMA, G.L. and CAPEL, H.W., Lattice equations, hierarchies and Hamiltonian structures 199

CICHOCKI, B., Enskog renormalization in linear kinetic theory 245

BONDAREV, B.V., The probability of the jump-diffusion-controlled reaction of a species pair 273

CIANCIO, V. and RESTUCCIA, L., The generalized Burgers equation in viscoanelastic media with memory 309

KIKUCHI, R., Second Hessian determinant as the criterion for order (first or second) of phase transition 321

SERRA, A. and RUBÍ, J.M., Hydrodynamics and Brownian motion in thin sheets 342

ISKE, P.L. and CASPERS, W.J., A mechanism for symmetry breaking in antiferromagnetic Heisenberg systems 360

KLIMONTOVICH, Yu.L., Irreversibility and fluctuation–dissipation relations 374

KLIMONTOVICH, Yu.L., Entropy evolution in self-organization processes. *H*-theorem and *S*-theorem 390

ŠKARKA, V., Collision superoperator in the subdynamics approach of inhomogeneous systems 405

ŠKARKA, V., Dynamical factorization of the evolution superoperator in inhomogeneous systems 424

FERRARI, L., An improved differential form of the Boltzmann collision operator for a Rayleigh gas (or Brownian particles) 441

BARUT, A.O. and ÜNAL, N., A new approach to bound-state quantum electrodynamics. I. Theory 467

BARUT, A.O. and ÜNAL, N., A new approach to bound-state quantum electrodynamics. II. Spectra of positronium, muonium and hydrogen 488

CATALDO, H.M., HERNÁNDEZ, E.S. and DORSO, C.O., Dynamical aspects of phonon–phonon coupling in collective mode damping 498

HERNÁNDEZ, E.S. and CATALDO, H.M., Two phonon induced single particle widths in thermally excited fermion matter 517

continued on page 3 of cover

continued on page 4 of cover

SANCHO, J.M., SAN MIGUEL, M., PESQUERA, L. and RODRIGUEZ, M.A., Positivity requirements on fluctuating parameters 532

BISWAS, B., Non-linear electron distribution around a heavy charged particle 548

SELJUGIN, O.V. and SMONDYREV, M.A., Perturbation theory for the multidimensional polaron 555

CÁCERES, M.O. and WIO, H.S., Non-Markovian diffusion-like equation for transport processes with anisotropic scattering 563

VLAD, M.O. and POPA, V.T., A first passage time problem for physicochemical systems with age structure 579

OBADA, A.-S.F., HASSAN, S.S. and MAHRAN, M.H., A non-linear response theory. I. General formulation 601

HASSAN, S.S., MAHRAN, M.H. and OBADA, A.-S.F., A non-linear response theory. II. Generalised dispersion relations 619

BREY, J.J., AIZPURU, C. and MORILLO, M., Exact solutions of the Fokker–Planck equation for the Malthus–Verhulst model 637

ERRATUM – FISHER, M.E. and MILTON, G.W., Classifying first-order phase transitions 649

ERRATUM – McCONNELL, J., Correlation and nuclear magnetic relaxation times 650
